A.R.K184ES DATA SHEET

SPECIFICATIONS &OPTIONS

Standards

- A.R.K series alternator conforms to the major international standards and specifications, including:
  -IEC60034, GB755, BS5000, VDE0530, NEMA, MG1-22, C22.2-100, CSA, AS1359 standard, etc.
- A.R.K series alterantor is certified by ISO9001 quality system.
- A.R.K series alterantor can be used for the generator set of CE mark.
- Other standards and certification can be based on customer requirements.

Electrical characteristics

- Insualtion & Impregnating

  Class H insulation.
  All wound components are impregnated with meterial and processes designed specially to provide protection against harsh enviroments encountered in generator application. Resin based meterials are selected and developed to provide the high build required for static windings and the high mechanical strength required for rotating components.
- 3-phase reconnectable with12 ends brought out to the terminals.
- 2/3 pitch ，can eliminates triple (3rd, 9th, 15th …) harmonics on the voltage waveform and is found to be the optimumdesign for trouble-free supply of non-linear loads.
- Telephone interference

  THF(as defined by IEC 60034-1) is less than 2%, TIF(as defined by NEMA MG1-32) is less than 50.
- Radio interference

  Brushless device and the high quality AVR ensure low levels of interference with radio transmissions.RFI suppression module may be installed if required.
- High efficiency and motor startup capability.

Mechanical properties

- Steel structure.
- Cast aluminum for front and rear cover.
- Rigid assembly, effectively reduces the vibration during running.
- All rotors are dynamically balanced to conform with BS6861.
- Half key dynamic balance is applied in double bearing structure.
- Non-maintenance sealed-for-life ball bearing.
- 120% overspeed ability.

Standard

Protection grade

- A.R.K series alternator protection level is IP23.
- Suitable for environment with 95% relative humidity.
- optional
  - -Inlet and filter, power reduced by 5%.
  - -Inlet and outlet filter, power reduced by 10% (IP44)
  - -Anti-condensation heater.
  - -Stator winding, bearing overheating protection.
  - -Outlet line design of outlet box.
  - -Center height can be customized according to requirements.

Excitation and voltage regulation system

MX341(with PMG)			Optional	Optional	Optional	Optional		
MX321(with PMG)							Standard	Standard

With the self-excited system, the main stator provides power via the automatic voltage regulator(AVR) to the exciter stator. The high efficency AVR ensures the voltage maintaining at the rated level.

The exciter rotor output is fed to the main rotor through a three phase full wave bridge rectifier. The rectifier is protected by surge suppressor from voltage spikes of short circuit or phase mismatching.

Application

Prime power, rental, telecom, mobile power station, lighting tower, railway, refrigeration and standby power.

Quality assurance

A.R.K series alterantors are manufactured using production procedures having a quality assurance level to ISO 9001.

Note: Continuous development of our products entitles usto change specification details without notice, thereforethey must not be regarded as binding.
